Tobacco Enterprises
Red Angus and Simmental Cattle

Dear Friends,

We are pleased to share our catalog and welcome you to our 12th Annual “More than a Bull” sale at Red Hill Farms. We are thankful to all our past customers and to the many commercial producers and purebred breeders who have studied and expressed interest in our cattle. In each of the last three Red Hill spring sales, bulls have sold into 13 states. It is humbling to learn of the success our customers are having with Red Hill genetics. Our goal is to provide practical breeding stock to improve the profitability of our customers. We pride ourselves in offering you, the customer, the results of our comprehensive records system—from birth to rail to cowherd records—and sharing all the information with you.

We have made every effort to provide information to simplify selection decisions. We realize that the number of EPDs available has continued to increase, and deciding how to use the entire array can be challenging. However, a logical solution is the use of selection indices - a procedure that combines all the EPDs into a \$ value. We provide genomically enhanced EPDs on every bull and those EPDs are used to calculate the index values. We have tremendous confidence in these indices and use them in our own selection programs. We are proud that our bulls rank near the top of each breed. We encourage you to take note of the percentile rankings given for each EPD and index. This value gives the relative ranking within each breed.

We welcome you to join us on Friday for our cow herd tours and evening “Cattle Talk”. The Friday evening program will feature our cooperator, Johnny Rogers, speaking on “Soil Health and Pasture Management”, and our Tennessee Beef Cattle Extension Specialist, Dr. Justin Rhinehart, giving an update on “Fetal Programming”.

A major reward of the seedstock business is the opportunity to enjoy the friendship and fellowship of our customers and fellow breeders. Visitors are always welcome to visit our farm to study our cattle, records, and production system. We also enjoy the opportunity to answer questions relative to the cattle and our operation. After reviewing the catalog, please contact us with any questions you might have. We hope to see you on March 17 and 18.
