3 Angus Bulls

Red Hill Farms

**Swine Seedstock
Tobacco Enterprises
Red Angus and Simmental Cattle**

Dear Friends,

We are pleased to share our catalog and welcome you to our 14th Annual “More than a Bull” sale at Red Hill Farms. We are thankful for our past customers and for the many commercial producers and purebred breeders who have studied and expressed interest in our cattle. In each of the last five Red Hill spring sales, bulls have sold into more than 13 states. It is humbling to learn of the success our customers are having with Red Hill genetics. Our goal is to provide practical breeding stock to improve the profitability of our customers. We pride ourselves in offering you, the customer, the results of our comprehensive records system—from birth to rail to cowherd records—and sharing all the information with you.

2018 was the year of genetic evaluation change for both the American Simmental Association and the Red Angus Association – transitioning to the IGS multi-breed evaluation enabled by BOLT technology. With this change, we encourage you to take note of the percentile rankings provided for each EPD. This value gives the relative ranking within each breed. While the EPDs may have changed, the differences you may notice on paper do not change the cattle themselves or our commitment to producing forage-adaptable cattle with a focus on the female!

We welcome you to join us on Friday for our cow herd tours and evening “Cattle Talk.” The Friday evening program will feature Dr. Chris Teutsch, Forage Specialist at the University of Kentucky Research and Education Center in Princeton, Kentucky. Dr. Teutsch will be covering a timely topic about restoring our pastures following the excess moisture we are having in the southeast.

A major reward of the seedstock business is the opportunity to enjoy the friendship and fellowship of our customers and fellow breeders. Visitors are always welcome to visit our farm to study our cattle, records, and production system. We also enjoy the opportunity to answer questions relative to the cattle and our operation. After reviewing the catalog, please contact us with any questions you might have. We hope to see you on March 15th and 16th.
