*Sales*

**Fall-Calving Red Angus Heifers  
Embryos • Semen**

*Proven producers of  
fescue adaptable cattle.*

Dear Friends,

We are excited to offer females once again in our 2nd Annual Online Maternal Monday sale! Rather than offering mature cows, we have decided to offer fall bred Red Angus heifers. These heifers are the result of generations of selection to improve Fertility, Stayability, Udder Quality, and Feet and Leg Soundness. Also, Disposition has always been of major importance in the Red Hill program. While economically relevant cow herd traits have driven the Red Hill Selection Program, we have always attempted to pull along as much growth and carcass superiority as possible.

For the first time, we are offering Red Angus embryos for sale. Thanks to our prolific donors exceeding our expectations, you can be the beneficiary by purchasing an embryo package. We are also offering semen from sires that have been used to develop the Red Hill program.

This Maternal Monday sale features Red Hill heifers and embryos as well as those from our cooperator, Rogers Cattle Company, LLC from North Carolina. Johnny and Sharon Rogers' herd consists primarily of fall calving Red Angus cows, and like the Red Hill program, they produce cattle that thrive on fescue-based pastures. It appears that fescue adaptable cattle have the potential to thrive in all environments in the US!

For those unfamiliar with an online sale, bidding changes to 'racehorse-style' at 8PM EDT/7PM CDT on Monday, May 17. Bidding will continue if there is activity within the allotted time frame (typically 3 to 5 minutes.) The sale ends when bidding activity ends. Videos of the heifers selling can be found on the DP Online Sales webpage.

We are most thankful to all previous customers and to those who have shown interest in the Red Hill program.

***Bart, Sarah and Ty Jones  
Gordon and Susan Jones***

**Fall-Calving Red Angus Heifers, Embryos and Semen**

*Maternal Monday*

**May 17, 2021**

*Online bidding closes at 8 p.m. EDT/ 7 p.m. CDT*

## *General Information*

**DELIVERY:** Delivery will be at cost. We will make every effort to assist with coordinating economical delivery. Red Hill heifers are located at the farm. Rogers' heifers are located in Roxboro, NC. We will transfer heifers between the two locations for no charge.

**VETERINARIAN:** Roger Thomas, DVM, Thomas and England Veterinary Services, (270-563-0011). Contact Dr. Thomas for any questions regarding Red Hill Farms' herd health.

**HEALTH:** All cattle are vaccinated using Zoetis vaccines. Please contact us with any health questions.

**\*\* COWHERD TESTED NEGATIVE TO BVD PI & JOHNE'S.**

### 22B 441F X 43H – 3 EMBRYOS

OPENING BID: \$300 X 3

Selling 3 conventional embryos. Guaranteeing 1 pregnancy if work is done by certified embryologist.

Location: Red Hill Farms (Lafayette, TN)

This embryo package is from the top producing cow family at Red Hill. 441F is an outstanding young female sired by 215C and from the Amber cow family. 441F's dam, 208C, and granddam, 204X, are model Red Angus cows. 441F has the same phenotype. Udder quality, rib and volume, structural soundness, fleshing ability, and very quiet dispositions are all attributes of this cow family.

The sire of these embryos, 43H, was the top-selling bull in the Spring 2021 Red Hill Bull Sale selling for \$21,500 to Shelby Cattle Company. 43H is a wide-centered, three-dimensional bull that impresses at every angle. His dam is another outstanding cow in our herd.

We transferred 15 of these embryos in April, and this is an opportunity to tap into the youngest, freshest genetics of the Red Hill program.

### 23A 208D X ENERGIZE – 4 EMBRYOS

OPENING BID: \$250 X 4

### 23B 208D X ENERGIZE – 4 EMBRYOS

OPENING BID: \$250 X 4

Selling 4 embryos. Guaranteeing 1 pregnancy if work is done by certified embryologist.

Location: Red Hill Farms (Lafayette, TN)

208D is an up-and-coming young donor at Red Hill. She is a top 1% HerdBuilder cow that combines two of Red Hill's most influential sires 176A and 84S. 208D caught our attention as a yearling heifer when she was 1st in her contemporary group for yearling weight, %IMF, and REA. As a cow, she displays exceptional maternal phenotype.

We have transferred several embryos from this mating. This cross with the big spread ENERGIZE bull should make excellent Red Angus cattle for all segments of the industry.

**24 254A X OSCAR – 3 EMBRYOS**

OPENING BID: \$250 X 3

258Z is a maternal sister to Nice'n Easy. Like her dam, 258Z is moderate, feminine, has an excellent udder, and is sound structured. She is a top 1% HerdBuilder cow with exceptional maternal qualities. We have several daughters in the herd.

These embryos are black/red carriers. We flushed 258Z to her opposite – SYDGEN ENHANCE. ENHANCE is the high output Angus bull with top 1% YW (155) and 1% MARB (0.93) in Red Angus. ENHANCE brings stellar indexes – 226 ProS (1%), 98 HB (15%), and 128 GM (1%).

## Red Angus Embryos

### 26A 271B X C18 – 3 EMBRYOS

OPENING BID: \$300 X 3

*Selling 3 conventional embryos. Guaranteeing 1 pregnancy if work is done by certified embryologist.*

*Location: Rogers Cattle Company (Roxboro, NC)*

PROS	HB	GM	CED	BW	WW	YW	MILK	ME	HPG	CEM	STAY	MARB	YG	CW	REA
119	86	33	14	-2.2	62	96	27	3	14	6	17	0.43	0.02	7	0.12

### 26B 271B X C18 – 3 EMBRYOS

OPENING BID: \$300 X 3

*C18 sets the standard for function in our herd. She's moderate at 1275 pounds and holds a BCS 6 through the winter on stockpiled fescue. Her hair coat is light colored and remains slick year-round. She is sound, easy keeping and has a flawless udder. The 271B mating has worked well to produce stout bulls and functional females. 271B has a unique pedigree, slick hair coat, and calm disposition along with balance in phenotype and performance. He displays exceptional feet and skeletal design along with extra thickness and volume.*

### 27 176A X B7 – 3 EMBRYOS

OPENING BID: \$300 X 3

*Selling 3 conventional embryos. Guaranteeing 1 pregnancy if work is done by certified embryologist.*

*Location: Rogers Cattle Company (Roxboro, NC)*

PROS	HB	GM	CED	BW	WW	YW	MILK	ME	HPG	CEM	STAY	MARB	YG	CW	REA
159	129	29	15	-4.2	50	79	24	-8	14	9	22	0.39	0.13	10	0.05

*We flushed B7 in 2017/2018 and believe she will make a significant contribution to the industry. She excels as a low maintenance cow with a great udder, feet and fleshing ability. She has sold bulls into NE, TN, MT and KY. 176A is a standout in every phase of production, and his progeny record has solidified his genetic superiority. 176A has excellent structural soundness, light colored and slick haired. We have used 176A heavily in our breeding program. 176A daughters are moderate, easy-fleshing females with excellent udders and great dispositions. The B7 x 176A combination will produce adaptable, efficient cattle with longevity.*

### 28 271B X B60 – 3 EMBRYOS

OPENING BID: \$300 X 3

*Selling 3 conventional embryos. Guaranteeing 1 pregnancy if work is done by certified embryologist.*

*Location: Rogers Cattle Company (Roxboro, NC)*

PROS	HB	GM	CED	BW	WW	YW	MILK	ME	HPG	CEM	STAY	MARB	YG	CW	REA
119	82	36	13	-1.6	70	108	28	6	12	4	18	0.50	0.09	16	0.09

*B60 sets the standard for maternal function in our herd. Her performance in a fescue environment speaks to her adaptability. She was the top performing wet two year old in her contemporary group while breeding back AI. Her second calf sired by 271B, E608, went on to dominant his peers (much like his dam) on his way to becoming the high selling Lot 1 in our 2019 Spring Bull Sale to 5L Red Angus in Sheridan, MT. We decided to flush B60 to 271B in fall 2019 due to his soundness and thickness. The weaned calves from this mating are impressive. The B60 x 271B mating generates performance cattle that will produce pay weight on forages.*
