Fall-Calving Bred Females –  
Red Angus and SimGenetics, Embryos, Semen

*Proven producers of  
fescue adaptable cattle.*

Dear Friends,

We are excited to offer females once again in our 4th Annual Online Maternal Monday sale! This offering consists of both fall-calving Red Angus cows as well as Red Angus and SimGenetics bred heifers. Thanks to our prolific donors exceeding our expectations, you can be the beneficiary by purchasing an embryo package. We are also offering semen from sires that have been used to develop the Red Hill program.

For those unfamiliar with our cattle breeding program, we are focused on the female. For generations we have selected to improve Fertility, Stayability, Udder Quality, and Feet and Leg Soundness. Also, Disposition has always been of major importance. While economically relevant cowherd traits have driven the Red Hill Selection Program, we have always attempted to pull along as much growth and carcass superiority as possible.

This Maternal Monday sale features Red Hill cows, heifers, and embryos as well as those from our cooperator, Rogers Cattle Company, LLC from North Carolina. Johnny and Sharon Rogers' herd consists primarily of fall-calving Red Angus cows, and like the Red Hill program, they produce cattle that thrive on fescue-based pastures. It appears that fescue adaptable cattle have the potential to thrive in all environments in the U.S.!

Rogers Cattle Company has been breeding Red Angus cattle for over 20 years. In this 2023 Maternal Monday sale, they are offering the opportunity to purchase foundation cows 6 years of age and older – a mature cowherd dispersal. Many of these cows have been successful donors. All these cows have been productive in the herd – producing standout bulls for the Red Hill bull sales. Please contact Johnny and Sharon Rogers with any questions about these cows.

For those unfamiliar with an online sale, bidding changes to 'racehorse-style' at 8PM EDT/7PM CDT on Monday, May 15. Bidding will continue if there is activity within the allotted time frame (typically 3 to 5 minutes.) The sale ends when bidding activity ends. Videos of the females selling can be found on the DP Online Sales webpage.

We are most thankful to all previous customers and to those who have shown interest in the Red Hill program.

## *General Information*

**DELIVERY:** Delivery will be at cost. We will make every effort to assist with coordinating economical delivery. Red Hill cows and heifers are located at the farm. Rogers' cows are located in Roxboro, NC. We will transfer females between the two locations for no charge.

**VETERINARIAN:** Roger Thomas, DVM, Thomas and England Veterinary Services, (270-563-0011). Contact Dr. Thomas for any questions regarding Red Hill Farms' herd health.

**HEALTH:** All cattle are vaccinated using Merck vaccines. Please contact us with any health questions.

**\*\* COWHERD TESTED NEGATIVE TO BVD PI & JOHNE'S.**

370J is a 3/8 SM heifer sired by our Red Angus herdsire, 367F. She is a big ribbed, red female.

# Red Angus Cows

Rogers Cattle Company has been breeding Red Angus cattle for over 20 years. In this 2023 Maternal Monday sale, they are offering the opportunity to purchase foundation cows 6 years of age and older – a mature cowherd dispersal. Many of these cows have been successful donors. All these cows have been productive in the herd – producing standout bulls for the Red Hill bull sales. Please contact Johnny and Sharon Rogers with any questions about these cows – LOTS 18-31.

254A is one of the best cows in our herd for weaning heavy calves. Her calves have a 113 WWR, and she has a 111 MPPA. Her mothering and milking ability is as good as it gets! These embryos are sired by the 136 ProS, top 1% MARB bull, ALC Mr. Oscar Y11. We have used OSCAR for his outcross pedigree, excellent calving ease, and breed leading marbling data. The Oscar sired bulls averaged \$5,900 in our Spring 2022 sale and were very well received by our customers.

This embryo package is from the top producing cow family at Red Hill. 441F is an outstanding young female sired by 215C and from the Amber cow family. 441F's dam, 208C, and granddam, 204X, are model Red Angus cows. 441F has the same phenotype. Udder quality, rib and volume, structural soundness, fleshing ability, and very quiet dispositions are all attributes of this cow family. The sire of these embryos, 43H, was the top-selling bull in the Spring 2021 Red Hill Bull Sale selling for \$21,500 to Shelby Cattle Company. 43H is a wide-centered, three-dimensional bull that impresses at every angle. His dam is another outstanding cow in our herd. We have a good set of these embryo calves on the ground. These calves certainly stand out in the pasture!

C18 sets the standard for function in our herd. She's moderate at 1275 pounds and holds a BCS 6 through the winter on stockpiled fescue. Her hair coat is light colored and remains slick year-round. She is sound, easy keeping and has a flawless udder. The 271B mating has worked well to produce stout bulls and functional females. 271B has a unique pedigree, slick hair coat, and calm disposition along with balance in phenotype and performance. He displays exceptional feet and skeletal design along with extra thickness and volume.

B60 is a standout for maternal function in our herd. Her performance in a fescue environment speaks to her adaptability. She was the top performing wet 2 year old in her contemporary group while breeding back AI. Her second calf sired by 271B, E608, went on to dominant his peers on his way to becoming the high selling Lot 1 in our 2019 Spring Bull Sale to 5L Red Angus in Sheridan, MT. We decided to flush B60 to 271B in fall 2019 due to his soundness and thickness. The B60 x 271B mating generates performance cattle that will produce pay weight on forages
